Meteorologist's View

Some uncertainty remains in regards to the timing and extent of rain arriving late on Saturday. Low confidence.

Forecast for Sunday 26 May 2024

Weather: Extensive low cloud and outbreaks of rain and drizzle overnight and early morning, gradually clearing by midday, with brighter skies developing. However, there will be some scattered heavy and thundery showers breaking out during the afternoon. The showers are likely to persist into the evening period.

Maximum wind: Southwesterly 15-20mph, with occasional gusts up to 25-30mph in or within the vicinity of heavy showers and thunderstorms.

Chance of cloud-free hill tops above 800m: 10% first thing, improving to 90% during the afternoon.

Low Cloud and visibility: Cloud bases down to 500m during the morning, with poor visibility in low cloud and rain. Cloud gradually lifting above the summits by midday, but may temporarily lower to the summit in heavier showers during the afternoon, with visibility poor in showers, but becoming good or very good in between the showers.

Temperature: **Valleys:** Plus 10 Celsius, becoming Plus 15 Celsius.
At 800m: Plus 4 Celsius, becoming Plus 7 Celsius.
Freezing level: Above the summits.
